RE: Rancho Tehama Reserve (RTR) Humboldt Drive Bridge (non-county structure)

Dear Eric:

Your recent letter, dated April 8, 2010, indicates that you still have questions regarding the standards to which a new bridge structure should be built. I will restate that **any proposed structure on a private or public road** is to be designed and constructed in accordance with the requirements of Chapter 2, F. Design, Section 14 Bridges, Tehama County Land Development and Engineering Design Standards (see attached). This does not limit the selection of a bridge type and allows a proponent to offer alternative bridge design options for clients. As such, the County does not recommend a particular type or style of bridge structure that an individual might present, only that it must be accompanied by the appropriate supporting data and in compliance with the standards noted herein.

Sincerely,

Gary Antone, P.E., P.L.S.  
Tehama County Public Works Director
